Human plus AI editing, often referred to as collaborative or augmented editing, is a process where both humans and artificial intelligence (AI) systems work together to enhance the quality and efficiency of editing tasks. This approach combines the strengths of human creativity, critical thinking, and subject expertise with the speed, consistency, and automation capabilities of AI.

FAQ

1) What's the turnaround time?

Ans . 2 Days (48 hours) from the time we receive the catalog

2) If any issue Related to Catalog?

- a) Profile missing
- b) Preset Missing
- c) Smart Preview Files Missing
- d) Files not Loading
- e) Image / File / Catalog Received Corrupt
- f) Less No. of Files Received
- g) More No. of Files Received
- h) Instruction received is not Clear
- l) others

If there's any issue raised by an editor and if client resolves it in the same day then catalog will be delivered within 48 hours if client resolves the issues next day, then automatically 24 hours will be increased for ETA

3) Redos

i) Once the 'Done Catalog' is delivered. Client needs to raise the Issue within 7 days with valid points and feedback. After 7 days we won't be accepting any redos.

ii) Once the redo is assigned it will be taken care within 12 to 24 hours with changes according to the client's requirements.

iii) If still there's an issue with the Colour Correction. You can ask for Double redo with the valid point/feedback then we will be deducting 50% of the cost of the whole catalog and will complete the Double redo and send it in within 12 to 24 hours. Still, after the double redo client is not happy then will cancel the order and ask the client to do it in-house and will refund the whole amount of that particular catalog.

4. Delayed

If order is not delivered on given TAT the following percentage will be compensated

Hours	Percentage
First 6 hours	10%
Next 12 hours	20%
Next 24 hours	50%
2nd day	Full Refund

5) Daily Capacity and Pricing

1. Our Capacity is between 20,000 to 30,000 images within 24hours
Along with Quality Check Done

How it Works?

6). Assigning order only Smart Preview file will be Valid file for the order

Client needs to make sure they don't upload the RAW files or Jpeg files

We ask the client to Build a Smart Preview Catalog on Lightroom

(We will help new Clients in initial stage to build the Smart preview catalog)

Later request to Follow same for further orders/catalog

i) We share clients a Google Form link with basic Questionary

ii) Form also includes to share the data/Catalog which directly uploads to our Google drive Servers

iii) Client need to Share the Reference/Sample images link or upload the images for the Catalog in the form

iii) Client can also share us the links of Uploaded data on any servers like, Dropbox, WeTransfer, Sendgb, Smash, etc any file transfers or Cloud service which can help us to get Clients Data/Catalog to process
